

How to configure ITR email on thunderbird

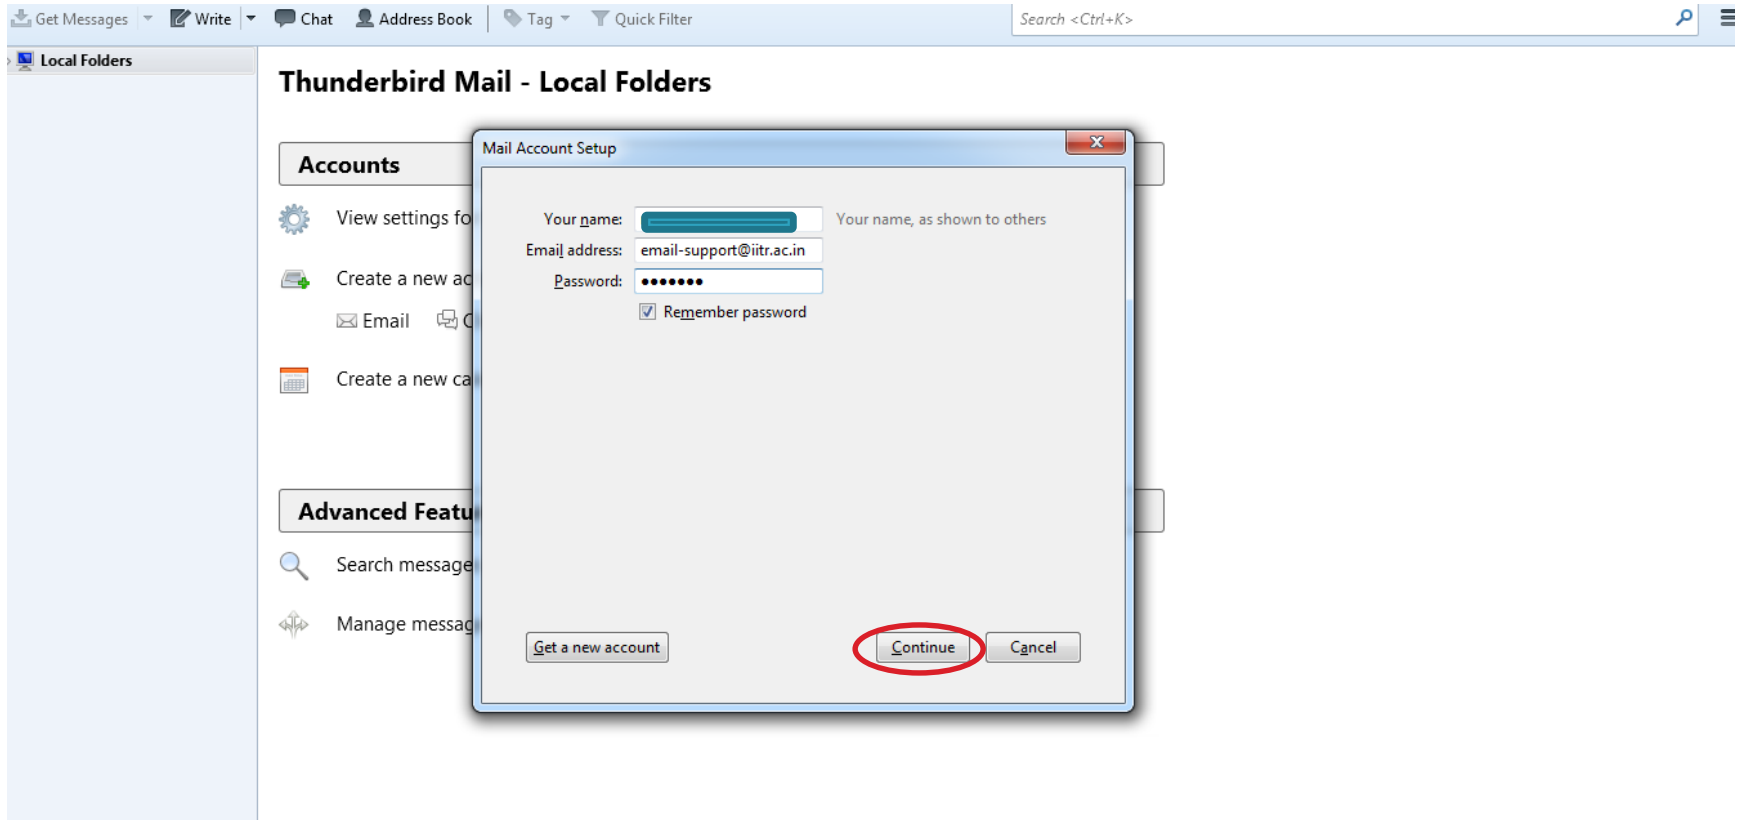

- open the thunderbird client (install if not)
- go to create email account
- click on email tab as shown below

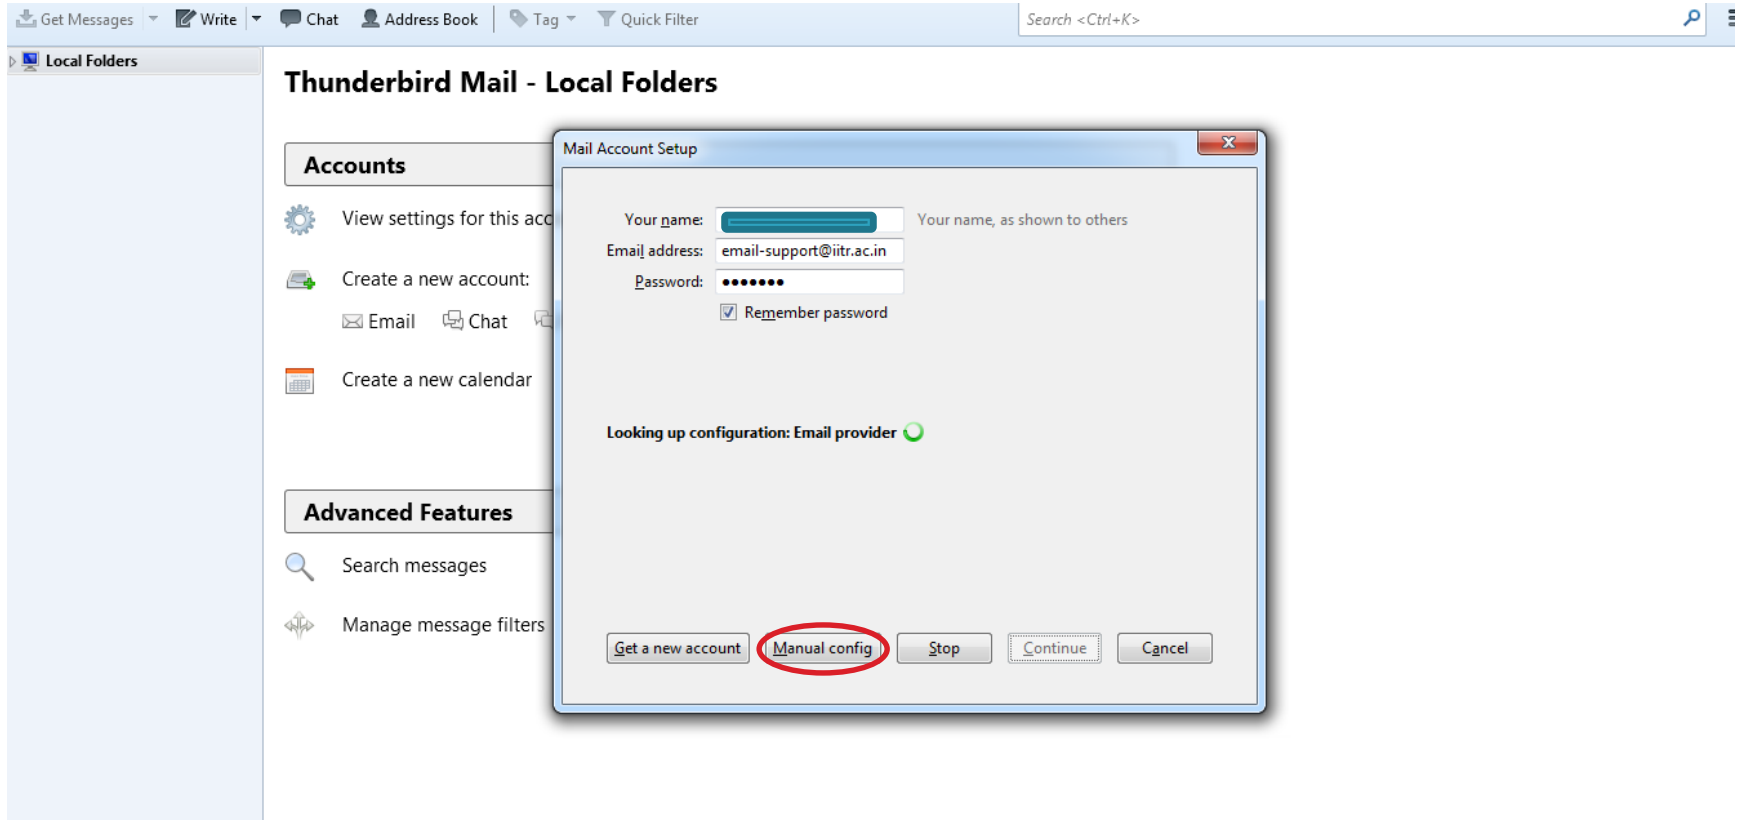

Click on skip this and use my existing email

Fill in the information as shown below and click on continue

Click on manual config

- Select incoming as IMAP and outgoing as SMTP
- Enter Server hostname as `imap.iitr.ac.in` and `smtp.iitr.ac.in` for IMAP and SMTP respectively
- Click on Re-test
- Click on done once the configurations are populated as shown below

Thunderbird Mail - Local Folders

The screenshot shows the 'Mail Account Setup' dialog box in Thunderbird. The 'Accounts' sidebar is visible on the left, and the 'Advanced Features' section is also visible. The main dialog box contains the following fields and options:

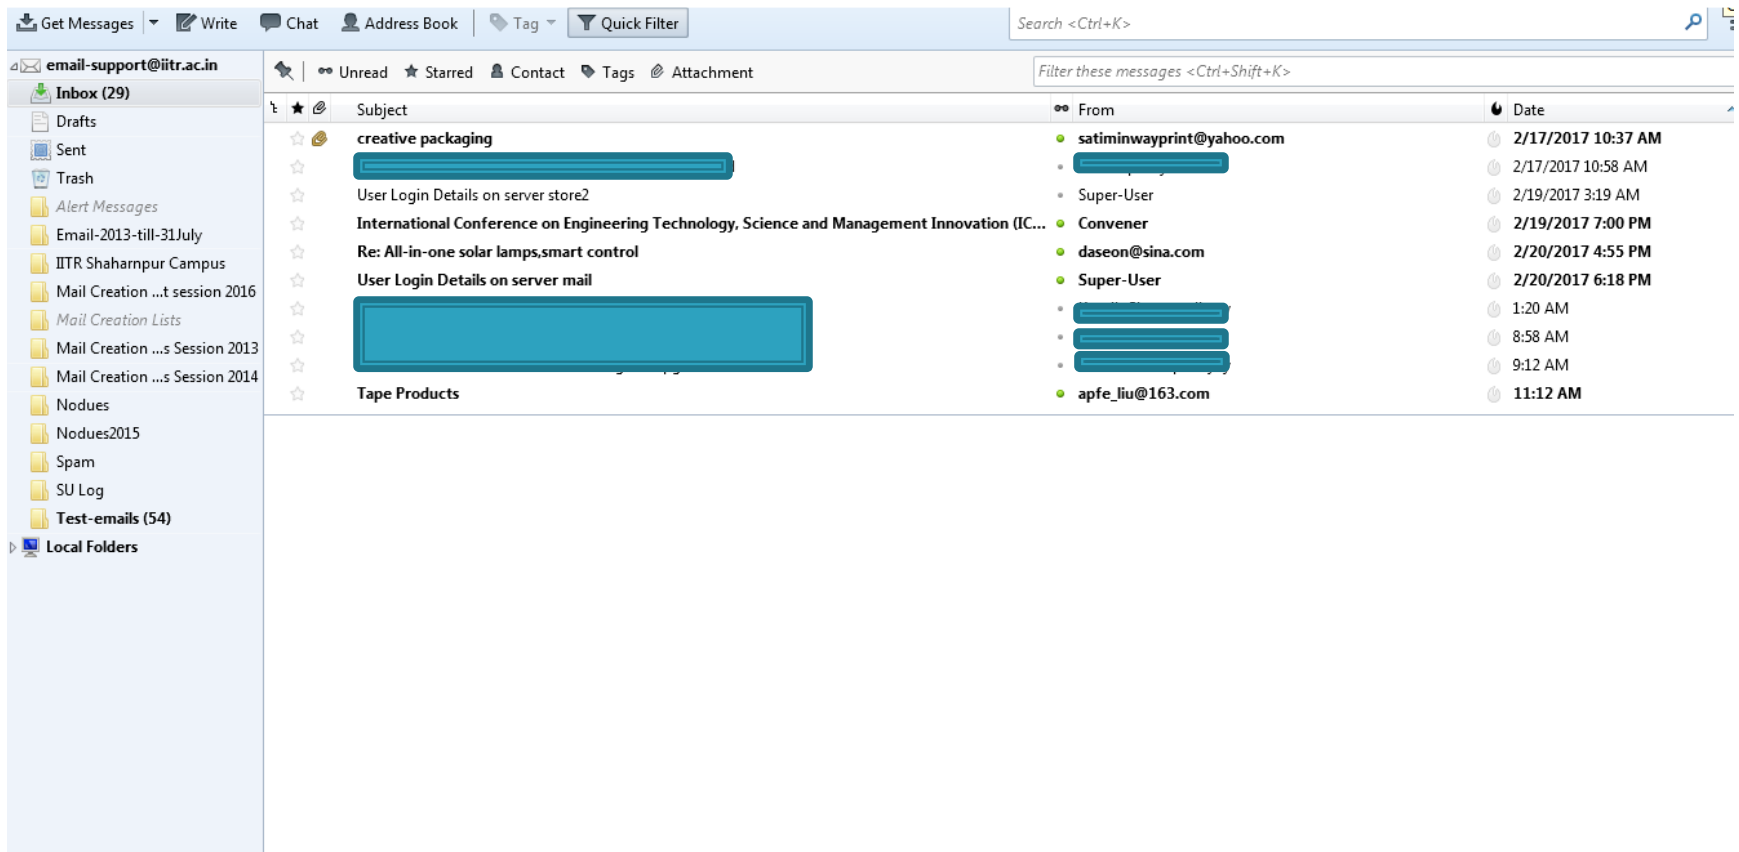

- Your name: Your name, as shown to others
- Email address:
- Password:
- Remember password

The following settings were found by probing the given server

	Server hostname	Port	SSL	Authentication
Incoming: IMAP	<input type="text" value="imap.iitr.ac.in"/>	<input type="text" value="143"/>	<input type="text" value="None"/>	<input type="text" value="Normal password"/>
Outgoing: SMTP	<input type="text" value="smtp.iitr.ac.in"/>	<input type="text" value="587"/>	<input type="text" value="None"/>	<input type="text" value="Normal password"/>
Username: Incoming:	<input type="text" value="email-support"/>	Outgoing:	<input type="text" value="email-support"/>	

Buttons at the bottom:

The mailbox would look like below once finished

Thank you!
