

Microsoft Teams for Education

Microsoft Teams for Education provides an online classroom so professors and students can find new ways to continue to focus on learning. Teams provides an online classroom that brings together virtual face-to-face connections, assignments, files and conversations into a single platform accessible on either mobile, tablet, PC or browser and compatible with any Operating system - Windows, iOS, MAC, Android.

Microsoft Teams is a hub for teamwork, a chat-based learning environment that enables Faculties and Students to form teams to be more productive by giving them a single and secure platform that brings together everything a team needs: chats, meetings, calls, files, and tools. Microsoft Teams is one place for all the needs your teams have.

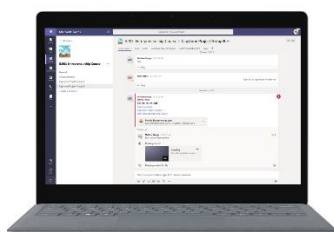

Microsoft Teams Momentum

Microsoft Teams delivers on four core promises to create a digital workspace for enabling student – teacher learning environment.

Communicate

Microsoft Teams solves for the communication needs of an education environment. Microsoft Teams has evolved to become a complete virtual meetings and calling solution, incl. chat, voice and video, Faculties and Students can use Teams for 1:1 or Group chats – directly on your phone or PC. This enables Students and faculties to share information in a transparent way to accelerate learning outcomes. Faculties can plan the Class timetable and setup Video meeting with the students to enable remote classes.

Collaborate

When it comes to collaboration, the deep Office integration enables today's 21st century learning skills with the use the Office apps which the students are familiar with and love - Word, Excel, PowerPoint, OneNote, SharePoint, - right within the platform of Teams.

Teams brings all the Office 365 services together – so that you can easily share and co-author files, share assignments and provide assessment feedbacks

Customize

Teams is highly customizable. Many universities use other services or applications. Teams to be the hub for all the services and tools your institute use on a day to day basis. So, you can customize Teams with tabs, connector and bots to include the apps and services you need – It's an extensible platform, to enable building apps and to integrate with existing School LMS or CRM.

Work with Confidence

The Fourth Pillar of Security is in the Core DNA of Microsoft Teams and it comes with the enterprise grade security, compliance and manageability that you expect from world class product that helps secures the schools online environment and helps in providing a seamless and fluent learning – teaching experience.
