SURVEY IN THE BEALADI-SALHAPUR

IIT Roorkee under UBA carried out survey in the Bealadi-Salhapur village during October –December 2019. The objective of the survey was to obtain the information of present scenario of the village, the availability of resources and major issues related to these resources, basic infrastructure and amenities in the village. In the village, entire population depends upon the hand pumps for fulfilment of their daily water needs. More than 96% households in the village have their own installed hand pumps. The TDS of drinking water 400-450, which is harmful for health. During the survey, it was found that the availability of clean drinking water is one of the major issue in the village which leads to water borne diseases. The groundwater is hard and salty. There is a need to educate and create awareness among local community on utilizing low cost methods to improve the quality of drinking water.

No health centre is available in the village. No para-medical staff and health workers are available in the village. In case of emergency, local people have to take the patient to the nearest hospital in Roorkee which is already crowded and overburdened with the patients. The lack of infrastructure in the village for sanitation causes frequent occurrence of multiple diseases and health problems. It has been informed by the village community that due to low quality drinking water and lack of hygiene conditions, diarrhea, hepatitis, typhoid and many other water borne disease are frequently occurring in the area. There is no proper drainage system in the village as a result there is mosquito breeding particularly during the monsoon season causing serious health problems. Also, no proper solid waste management system in the village is available in the village and garbage waste are openly being dumped alongside of the streets.

Quarterly Report of UBA

October, November, December 2019

As MHRD declared Swachhtha hei Seva, a plastic waste free campaign from September 11 to October 27, we have conducted certain programmes in association with it

1. An oath in connection with Swachhtha he seva was taken in college auditorium on September 27, 2019.

The UBA Coordinator and Dean Students Welfare, lead the ceremony which had student and faculty

Participation in it.

1. An essay writing contest on the topic Plastic waste free India was conducted on 30.9.19

2. Sramadan was conducted in and around college campus on 2/10/19 . Active faculty and student participation was the biggest highlight of the event. A rally was organized by the students holding pluck cards with slogans against plastic waste in the locality outside college campus

3. Students of Institute of Technology Gopeshwar visited the nearby Government Offices to distribute jute bags to the officials. This was an initiative to spread the message of avoiding plastic products and promoting alternate materials

4. A poster design contest was organized for students in the Institute campus on 19.10.19. The theme of the contest was plastic waste free India

Villages Survey:

1. To understand need of villages and their problems our college students take a one survey. In which information of their family members, Government schemes which they are taking benefits, their problems, according to that we submit report to the GramSevak and Sarpanch of the villages.
2. To increase the irrigated area, watershed development was undertaken by providing core wall by digging puddle punch trench up to level of hard rock. It was a cost-effective solution and it was as effective as cement check dam.
