How to install CA Certificate on Google Chrome

Download Link

- Open the link "https://www.iitr.ac.in/support/faq/certificate.html" and download the "**WSA proxy certificate**".
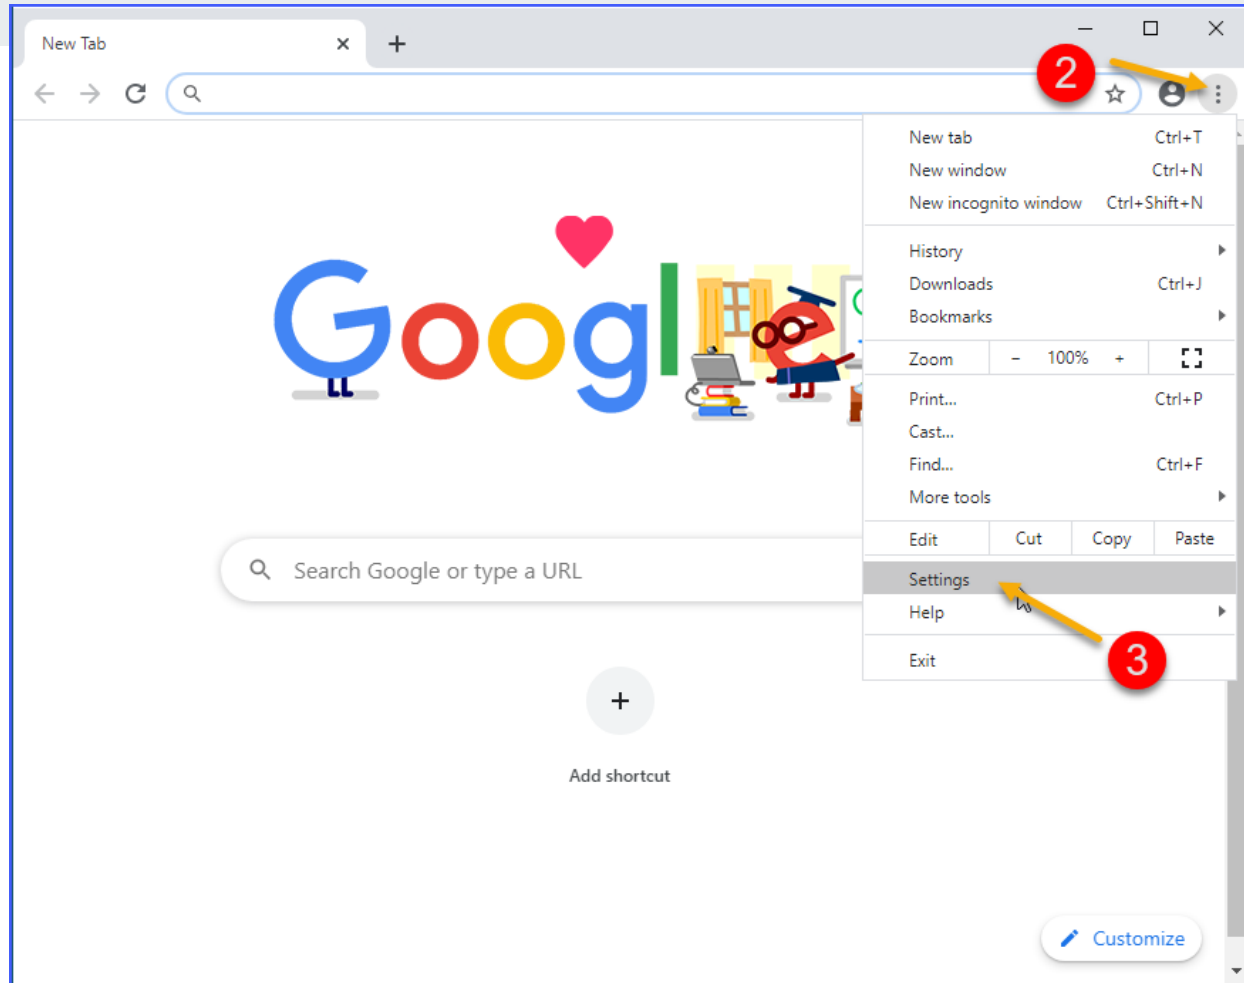

Procedure

1. Open the browser
2. Click **Customize and control Google Chrome** button in the upper right corner
3. Choose **Settings**

Open Google Chrome Settings

4. Under **Privacy and security section**, click **Security**.
5. Click **Manage device certificates**, The new window will appear.

Manage device certificates
Manage HTTPS/SSL certificates on your device

Certificates managed by Chrome
Information about how Chrome manages its root certificates

Google Advanced Protection Program
Safeguards the personal Google Accounts of anyone at risk of targeted attacks

6. Choose **Trusted Root Certification Authorities** tab

7. Click **Import**

8. In the opened window, click **Next**

9. In the next window click **Browse**, navigation window will appear

10. Navigate to the folder where the downloaded certificate is stored

11. Choose **All Files as a files type**

12. Click on **IITRWSA_New.crt**

13. Click **Open**

14. Click **Next** for the following steps

15. Click **Finish**

16. Security Warning will appear. Just click **Yes**

17. In Certificate Import Wizard click **OK**

THANK YOU !
