

How to install CA Certificate in iOS

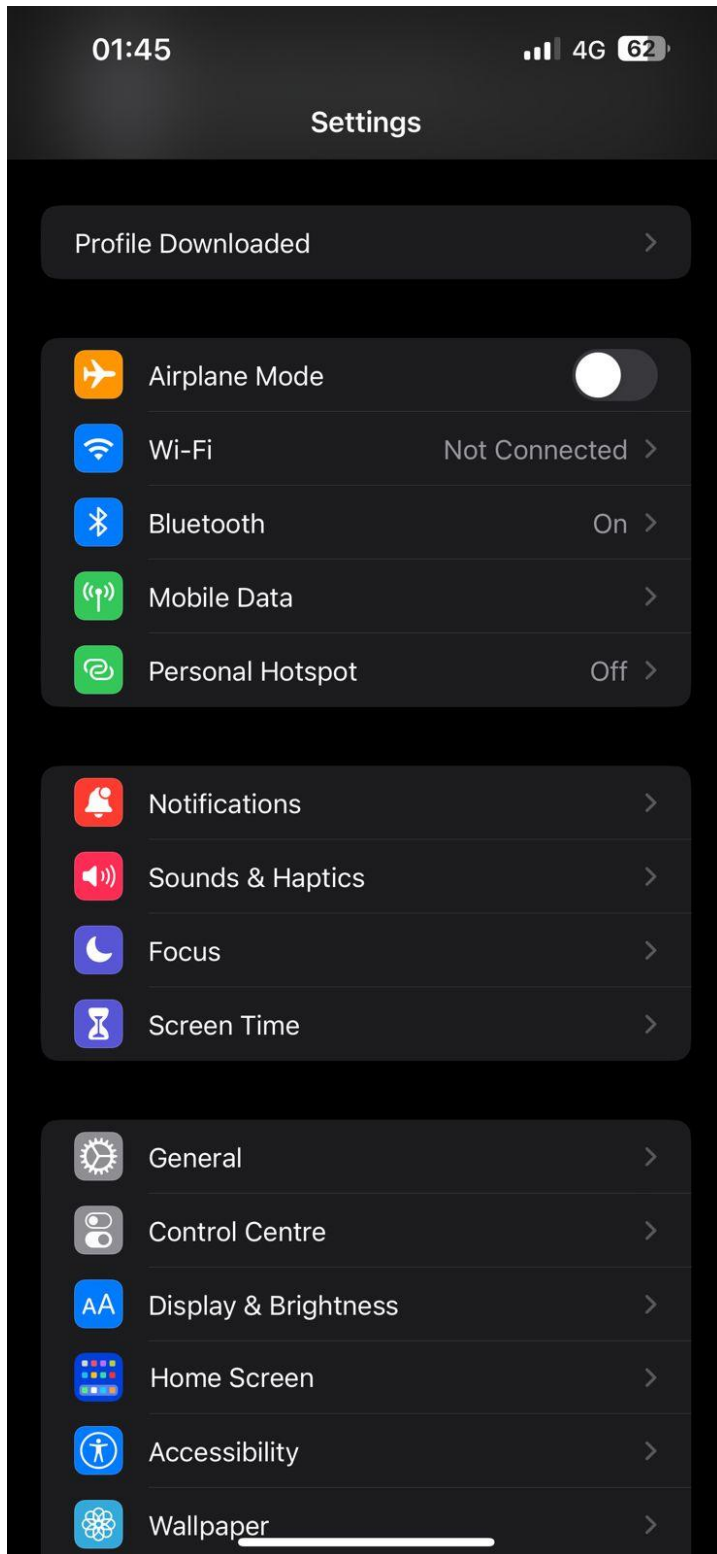

1. Open the link “<https://www.iitr.ac.in/support/faq/certificate.html>” and download the “**WSA proxy certificate**”.

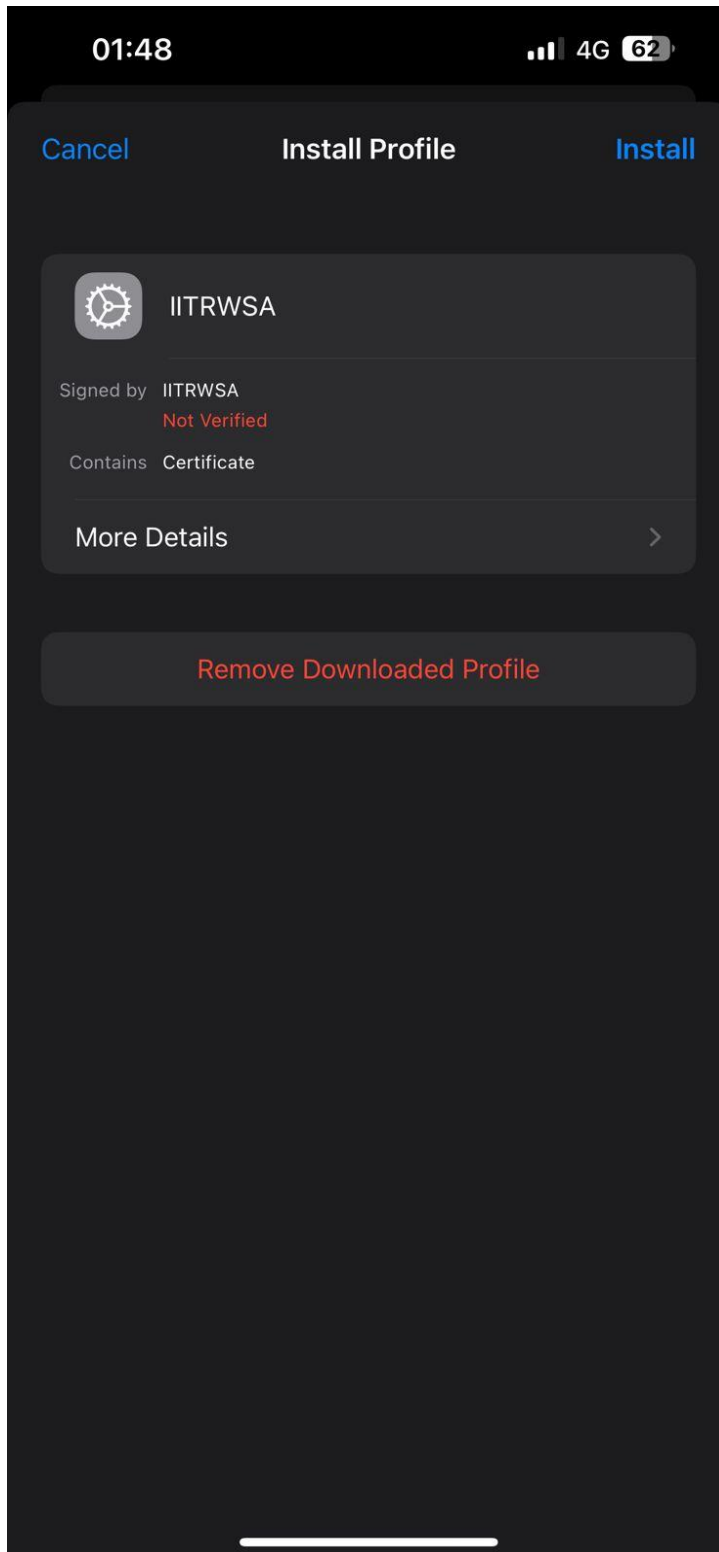

2. Click on the downloaded certificate **IITRWSA_New.crt** and it will prompt as Profile Downloaded.

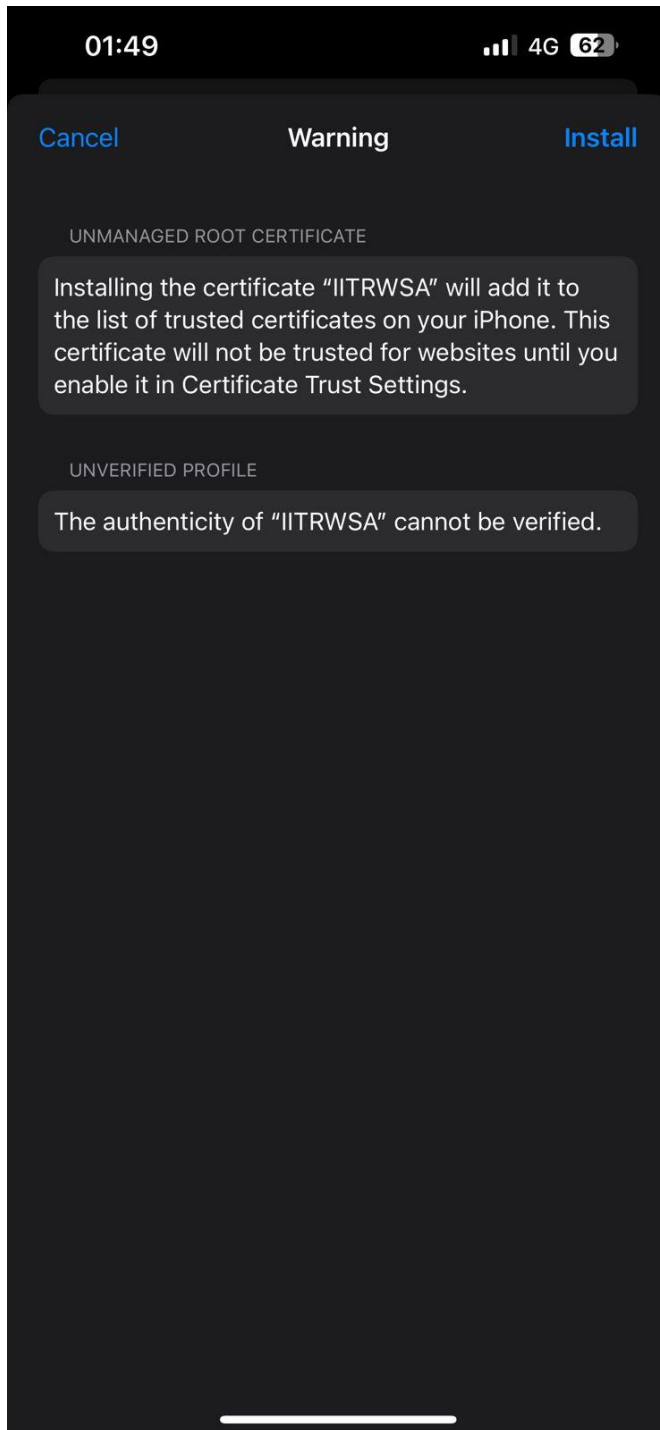

3. Go to the **settings** and click on **Profile Downloaded** setting.

4. Click on **install** to install the profile.

5. Accept the warning and **install**.

6. Go to **Settings** —> **General** —> **About** —> **Certificate Trust Settings**

7. Enable the full trust for the **IITRWSA** root certificate and click **Continue**.
