

User Guide For CentOS For New Network Connectivity.

1. Press Windows Key and search for Network and click on **Network**.

2. **Edit** your Wired connection settings.

3. Select **Security** tab and configure as shown in picture below, use your username and password and click Apply.

The screenshot shows the 'Wired' network configuration window with the 'Security' tab selected. The 'Apply' button is highlighted with a red circle. The 'Security' tab is also highlighted with a red circle. The configuration is as follows:

Field	Value
802.1x Security	ON
Authentication	Protected EAP (PEAP)
Anonymous identity	
CA certificate	(None)
No CA certificate is required	<input checked="" type="checkbox"/>
PEAP version	Automatic
Inner authentication	MSCHAPv2
Username	username
Password	password
Show password	<input checked="" type="checkbox"/>
